## **Re: Letter of recommendation**

To whom it might concern,

Dear sir,

Micheal Doyle Civil Engineering (MDCE) constructed more than 7 km of site roads and 18 crane pads for Castledockrell Wind Farm, within the agreed time frame.

In addition, the project was able to make significant cost savings due to close cooperation between the engineers of MDCE, the design team and the client. This close working relationship meant that the cost reduction did not have a negative impact on the quality of construction.

We appreciated the cooperation with MDCE, their work ethic, attitude, experience and adherence to our instructions. They also delivered on their promises..

We have to conclude that even after the serious weather conditions during the project, and the heavy traffic (loads and frequency), the project was completed above our expectations and we are very happy to recommend MDCE to anyone who is looking for a civil contractor.

Best regards,

Klaas Guldie

Project Manager Castledockrell Wind Farm Ltd
